PhD student at the University of Castilla-La Mancha.

**ARMANDO SÁNCHEZ** is a Chemistry PhD student in the Department of Analytical Chemistry and Food Technology at the University of Castilla-La Mancha (Faculty of Environmental Sciences and Biochemistry, Toledo) since 2018. His current research is focused on developing new tools and methods for the characterization, quantification and determination of Pt and Pd nanoparticles in environmental samples.

He received his **Bachelor of Environmental Sciences** (Specialty in Analysis & Technology of the Environment) (2011-2015) from the University of Castilla-La Mancha and his **Master's Degree on Environmental Sustainability** (Specialty in Environmental Quality) (2015-2016) from the University of Castilla-La Mancha. Also, he obtained his **Specialist** title in **Environmental Quality and Management** (2017) from JCCM-UCLM.

He has published one scientific paper and has worked in two research projects.
